### MIKKIE'S CORNER - Health & Nutrition

*Fear is faith that it won't work out!*

So it's well into January and you may have or may not have started a New Year's resolution to exercise. Or maybe you have started for the simple fact that after a few weeks of "letting yourself go" has caused blood pressure to rise or waistline to bulge. Whatever it is, always make the reason your health!

Let's face it some people love to exercise and others just don't! So for those that don't it's a hard motivator especially if you don't have any symptoms or signs just yet. Or famously you try to exercise and it is different, strange and scary feeling when muscles hurt after. This always amazes me as how much hurt do many endure on a daily basis because of no exercise. Sore joints, stiffness, aches, pains and allowing the body to be at risk for life threatening diseases as heart disease, cancer and diabetes. Don't make fear your reality!

Exercise has to be looked at like daily hygiene: brushing your teeth, washing your hands, brushing your hair...we do these things because it can affect our health, well being or how we view ourselves. It must become part of our daily routine. 30 minutes a day to start is all you need. You will still have 23.5 hours to get done whatever else you need to do!

I promise you once you can get past that odd muscle feeling, you will soon come to love how your body feels and oddly enough look forward to that feeling.

*Mikkie Nettles, CHN/PT (Certified Holistic Nutritionist/Personal Trainer)*
