SECOND COLLECTION

Due to COVID, a number of the second collections were missed during this year. In order to give parishioners who missed the opportunity to contribute to the various needs of the Universal Church, "Special Collection Sunday" has been designated in our Dioceses for **October 18, 2020**. Parishioners who wish to contribute to: the Church in the Holy Land, the Needs of the Church in Canada, the Popes Pastoral Works, and World Mission Sunday (originally scheduled for October 25) are encouraged to bring their envelopes for these important works of the Church to the October 18 mass.

The faithful in the Diocese of Kamloops remain dispensed from the obligation to attend Sunday Mass. As of present, some of our Diocesan priests still have online Masses that they are celebrating available through social media. Please check our website at https://www.rcdk.org/pages/covid-19-streaming-masses

PLEASE NOTE

Please register for Sunday mass during office hours. If you've previously registered and are unable to attend, inform the office through email or phone call so that others may get a place. Thank you for your co-operation. God Bless and stay safe.

THANK YOU

Peace and every blessing! Our heart is rejoicing and grateful to the Lord our God for his love and faithfulness for our 12 years of the mission that he entrusted to us in the Kamloops Diocese. On behalf of our congregation, the Franciscan Sisters of the Immaculate Conception of the Holy Mother of God, and our cosisters; Sisters Tarcie, Maria, Anna Dorinda, and Maria Luisa, we would

like to thank everyone for your prayers, love, support and generosity. You helped us to accomplish all the many good things that the Lord wanted us to do. Rest assured that we will continue to pray for all of you. Please also remember us in your prayers. May the Lord bless and keep you.

MIKKIE'S CORNER- Health and Nutrition

Puffiness, bloating, edema = water retention – HYDRATION

Why does this happen? The body tries hard to keep itself in homeostasis (balance) in many ways and one of the keyways is through electrolytes (minerals).

- Too high a concentration of minerals, in cells = water being let into the cells
- Too high water in the cells = minerals being brought into the cells.

A short-term minor imbalance won't kill us, but it is a sign that we should pay attention. This can happen at any time of the year, but summer seems to be most prevalent. It can seem to happen out of nowhere - suddenly your ankles are puffy and your fingers are like sausages. It's usually because we are not acclimatized for the hot day, or you spent too much time in the sun. It seems odd to think if you are dehydrated how can you be retaining water? But it makes sense for cell salvation. Cells are alerted of danger and go into a water starvation mode, hanging onto whatever they have not letting go, thus, retaining water. Signs of dehydration to follow next week!
